

What's the difference between sea lions & seals?

SEA LIONS

Smooth whiskers

Ear flaps

Long hairless front flippers & 3 toenails ONLY on the hindflippers

Rotate their hind flippers under their bodies, enabling them to walk or even run on land

Swim underwater by steering with hind flippers & powering with foreflippers like a bird

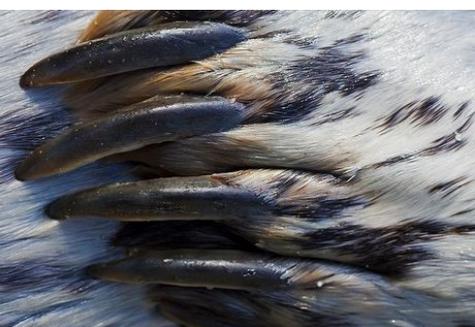

Seal Lion Pup Nursing

SEALS

Beaded or crimped whiskers

Short, fur-covered front flippers with long claws

On land, hind flippers held straight, the animal moving by rolling forward on their bellies like a caterpillar

Swim underwater by steering with foreflippers & powering with hind flippers

Seal Pup Nursing
