

An assembly presentation is a quick, vibrant method to get your school riled up to learn about the marine environment and move them into conservation action that makes a difference. The Marine Assembly Program is a FREE 20-40-minute presentation by the talented marine educators from Dolphin Encounters. You pick

from the available marine topics and the participating classes and we tailor the program for their grade levels.

Protect conch & grouper? Get rid of invasive species? Participate in the annual Marine Education Poster Contest? We got you in a MAP! Take this opportunity to bring the mysteries of the sea and ocean stewardship to your school.

## Assembly Includes:

- 2 Marine Educators
- Audio & Visual Resources
- Assembly Topics -
  - \* Marine Mammals

### A Bahamian Teacher Experience

For some educators, it may be the first time you even thought of meeting a dolphin or touching live conch and starfish. But a nation of 700 islands needs teachers to experience real marine education and bring that excitement back into the classroom or out on a field trip.

How do we train marine mammals? Why is it important to protect our ocean resources like conch? How can we inspire our kids to be ocean stewards? These are just some of the

questions teachers may learn about in the Seize The Seas Program. Experience first hand what your students will do on a field trip to Dolphin Encounters.

Want to stay and play or bring family? See

Options A, B & C to extend your day on Blue Lagoon Island.

This program is only available on selected Saturdays during the school year. Contact Education today to get your space in the next Seize The Seas!
